

Python Interview Workbook (100 Mixed Logical Questions - No Loops)

Question 1

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Variables and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Variables ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Variables, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Variables

Difficulty: □

Question 2

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Input/Output and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Input/Output ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Input/Output, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Input/Output

Difficulty: □

Question 3

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Type Casting and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Type Casting ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Type Casting, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Type Casting

Difficulty: □

Question 4

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Strings and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Strings ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Strings, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Strings

Difficulty: □

Question 5

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Lists and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Lists ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Lists, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Lists

Difficulty: □

Question 6

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Tuples and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Tuples ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Tuples, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Tuples

Difficulty: □

Question 7

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Dictionary and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Dictionary ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Dictionary, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Dictionary

Difficulty: □

Question 8

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Sets and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Sets ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Sets, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Sets

Difficulty: □

Question 9

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around if-else and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). if-else ka use karke logic banao aur expected result print karo.

Answer (Hint): Use if-else, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: if-else

Difficulty: □

Question 10

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Logical Operators and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Logical Operators ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Logical Operators, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Logical Operators

Difficulty: □

Question 11

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Relational Operators and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Relational Operators ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Relational Operators, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Relational Operators

Difficulty: □

Question 12

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around in/is and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). in/is ka use karke logic banao aur expected result print karo.

Answer (Hint): Use in/is, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: in/is

Difficulty: □

Question 13

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Variables and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Variables ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Variables, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Variables

Difficulty: □

Question 14

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Input/Output and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Input/Output ka use karke

logic banao aur expected result print karo.

Answer (Hint): Use Input/Output, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Input/Output

Difficulty: □

Question 15

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Type Casting and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Type Casting ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Type Casting, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Type Casting

Difficulty: □

Question 16

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Strings and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Strings ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Strings, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Strings

Difficulty: □

Question 17

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Lists and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Lists ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Lists, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Lists

Difficulty: □

Question 18

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Tuples and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Tuples ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Tuples, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Tuples

Difficulty: □

Question 19

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Dictionary and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Dictionary ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Dictionary, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Dictionary

Difficulty: □

Question 20

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Sets and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Sets ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Sets, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Sets

Difficulty: □

Question 21

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around if-else and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). if-else ka use karke logic banao aur expected result print karo.

Answer (Hint): Use if-else, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: if-else

Difficulty: □

Question 22

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Logical Operators and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Logical Operators ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Logical Operators, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Logical Operators

Difficulty: □

Question 23

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Relational Operators and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Relational Operators ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Relational Operators, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Relational Operators

Difficulty: □

Question 24

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around in/is and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). in/is ka use karke logic banao aur expected result print karo.

Answer (Hint): Use in/is, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: in/is

Difficulty: □

Question 25

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Variables and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Variables ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Variables, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Variables

Difficulty: □

Question 26

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Input/Output and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Input/Output ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Input/Output, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Input/Output

Difficulty: □

Question 27

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Type Casting and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Type Casting ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Type Casting, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Type Casting

Difficulty: □

Question 28

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Strings and produce

the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Strings ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Strings, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Strings

Difficulty: □

Question 29

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Lists and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Lists ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Lists, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Lists

Difficulty: □

Question 30

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Tuples and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Tuples ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Tuples, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Tuples

Difficulty: □

Question 31

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Dictionary and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Dictionary ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Dictionary, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Dictionary

Difficulty: □

Question 32

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Sets and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Sets ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Sets, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Sets

Difficulty: □

Question 33

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around if-else and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). if-else ka use karke logic banao aur expected result print karo.

Answer (Hint): Use if-else, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: if-else

Difficulty: □

Question 34

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Logical Operators and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Logical Operators ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Logical Operators, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Logical Operators

Difficulty: □

Question 35

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Relational Operators and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Relational Operators ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Relational Operators, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Relational Operators

Difficulty: □

Question 36

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around in/is and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). in/is ka use karke logic banao aur expected result print karo.

Answer (Hint): Use in/is, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: in/is

Difficulty: □□□

Question 37

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Variables and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Variables ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Variables, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Variables

Difficulty: □□□

Question 38

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Input/Output and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Input/Output ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Input/Output, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Input/Output

Difficulty: □□□

Question 39

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Type Casting and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Type Casting ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Type Casting, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Type Casting

Difficulty: □□□

Question 40

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Strings and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Strings ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Strings, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Strings

Difficulty: □□□

Question 41

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Lists and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Lists ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Lists, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Lists

Difficulty: □□□

Question 42

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Tuples and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Tuples ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Tuples, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Tuples

Difficulty: □□□

Question 43

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Dictionary and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Dictionary ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Dictionary, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Dictionary

Difficulty: □□□

Question 44

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Sets and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Sets ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Sets, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Sets

Difficulty: □□□

Question 45

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around if-else and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). if-else ka use karke logic

banao aur expected result print karo.

Answer (Hint): Use if-else, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: if-else

Difficulty: □□□

Question 46

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Logical Operators and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Logical Operators ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Logical Operators, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Logical Operators

Difficulty: □□□

Question 47

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Relational Operators and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Relational Operators ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Relational Operators, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Relational Operators

Difficulty: □□□

Question 48

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around in/is and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). in/is ka use karke logic banao aur expected result print karo.

Answer (Hint): Use in/is, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: in/is

Difficulty: □□□

Question 49

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Variables and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Variables ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Variables, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Variables

Difficulty: □□□

Question 50

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Input/Output and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Input/Output ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Input/Output, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Input/Output

Difficulty: □□□

Question 51

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Type Casting and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Type Casting ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Type Casting, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Type Casting

Difficulty: □□□

Question 52

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Strings and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Strings ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Strings, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Strings

Difficulty: □□□

Question 53

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Lists and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Lists ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Lists, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Lists

Difficulty: □□□

Question 54

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Tuples and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Tuples ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Tuples, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Tuples

Difficulty: □□□

Question 55

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Dictionary and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Dictionary ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Dictionary, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Dictionary

Difficulty: □□□

Question 56

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Sets and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Sets ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Sets, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Sets

Difficulty: □□□

Question 57

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around if-else and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). if-else ka use karke logic banao aur expected result print karo.

Answer (Hint): Use if-else, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: if-else

Difficulty: □□□

Question 58

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Logical Operators and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Logical Operators ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Logical Operators, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Logical Operators

Difficulty: □□□

Question 59

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Relational Operators

and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Relational Operators ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Relational Operators, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Relational Operators

Difficulty: □□□

Question 60

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around in/is and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). in/is ka use karke logic banao aur expected result print karo.

Answer (Hint): Use in/is, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: in/is

Difficulty: □□□

Question 61

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Variables and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Variables ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Variables, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Variables

Difficulty: □□□

Question 62

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Input/Output and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Input/Output ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Input/Output, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Input/Output

Difficulty: □□□

Question 63

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Type Casting and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Type Casting ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Type Casting, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Type Casting

Difficulty: □□□

Question 64

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Strings and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Strings ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Strings, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Strings

Difficulty: □□□

Question 65

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Lists and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Lists ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Lists, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Lists

Difficulty: □□□

Question 66

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Tuples and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Tuples ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Tuples, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Tuples

Difficulty: □□□

Question 67

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Dictionary and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Dictionary ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Dictionary, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Dictionary

Difficulty: □□□

Question 68

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Sets and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Sets ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Sets, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Sets

Difficulty: □□□

Question 69

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around if-else and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). if-else ka use karke logic banao aur expected result print karo.

Answer (Hint): Use if-else, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: if-else

Difficulty: □□□

Question 70

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Logical Operators and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Logical Operators ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Logical Operators, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Logical Operators

Difficulty: □□□

Question 71

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Relational Operators and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Relational Operators ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Relational Operators, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Relational Operators

Difficulty: □□□□□

Question 72

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around in/is and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). in/is ka use karke logic banao aur expected result print karo.

Answer (Hint): Use in/is, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: in/is

Difficulty: □□□□□

Question 73

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Variables and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Variables ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Variables, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Variables

Difficulty: □□□□□

Question 74

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Input/Output and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Input/Output ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Input/Output, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Input/Output

Difficulty: □□□□□

Question 75

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Type Casting and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Type Casting ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Type Casting, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Type Casting

Difficulty: □□□□□

Question 76

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Strings and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Strings ka use karke logic

banao aur expected result print karo.

Answer (Hint): Use Strings, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Strings

Difficulty: □□□□□

Question 77

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Lists and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Lists ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Lists, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Lists

Difficulty: □□□□□

Question 78

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Tuples and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Tuples ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Tuples, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Tuples

Difficulty: □□□□□

Question 79

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Dictionary and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Dictionary ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Dictionary, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Dictionary

Difficulty: □□□□□

Question 80

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Sets and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Sets ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Sets, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Sets

Difficulty: □□□□□

Question 81

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around if-else and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). if-else ka use karke logic banao aur expected result print karo.

Answer (Hint): Use if-else, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: if-else

Difficulty: □□□□□

Question 82

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Logical Operators and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Logical Operators ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Logical Operators, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Logical Operators

Difficulty: □□□□□

Question 83

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Relational Operators and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Relational Operators ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Relational Operators, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Relational Operators

Difficulty: □□□□□

Question 84

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around in/is and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). in/is ka use karke logic banao aur expected result print karo.

Answer (Hint): Use in/is, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: in/is

Difficulty: □□□□□

Question 85

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Variables and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Variables ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Variables, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Variables

Difficulty: □□□□□

Question 86

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Input/Output and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Input/Output ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Input/Output, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Input/Output

Difficulty: □□□□□

Question 87

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Type Casting and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Type Casting ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Type Casting, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Type Casting

Difficulty: □□□□□

Question 88

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Strings and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Strings ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Strings, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Strings

Difficulty: □□□□□

Question 89

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Lists and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Lists ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Lists, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Lists

Difficulty: □□□□□

Question 90

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Tuples and produce

the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Tuples ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Tuples, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Tuples

Difficulty: □□□□□

Question 91

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Dictionary and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Dictionary ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Dictionary, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Dictionary

Difficulty: □□□□□

Question 92

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Sets and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Sets ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Sets, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Sets

Difficulty: □□□□□

Question 93

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around if-else and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). if-else ka use karke logic banao aur expected result print karo.

Answer (Hint): Use if-else, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: if-else

Difficulty: □□□□□

Question 94

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Logical Operators and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Logical Operators ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Logical Operators, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Logical Operators

Difficulty: □□□□□

Question 95

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Relational Operators and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Relational Operators ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Relational Operators, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Relational Operators

Difficulty: □□□□□

Question 96

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around in/is and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). in/is ka use karke logic banao aur expected result print karo.

Answer (Hint): Use in/is, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: in/is

Difficulty: □□□□□

Question 97

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Variables and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Variables ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Variables, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Variables

Difficulty: □□□□□

Question 98

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Input/Output and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Input/Output ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Input/Output, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Input/Output

Difficulty: □□□□□

Question 99

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Type Casting and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Type Casting ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Type Casting, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Type Casting

Difficulty: □□□□□

Question 100

English: Imagine you are in a coding interview. Solve a Python problem using only the concepts learned so far (no loops/functions). Create logic around Strings and produce the required output based on given conditions.

Hinglish: Maan lo interviewer ne tumse Python ka question pucha hai. Sirf abhi tak padhe hue concepts use karo (loops/functions bilkul nahi). Strings ka use karke logic banao aur expected result print karo.

Answer (Hint): Use Strings, conditional statements, comparison/logical operators wherever required. Don't use loops.

Expected Output: Print the correct result according to the given condition.

Concept Used: Strings

Difficulty: □□□□□
